PREDICTABLE CLIMATE VARIABILITY & ITS APPLICATIONS

»» **CLIMATE MODELING AND DYNAMICS**

»» **SUBSEASONAL-TO-SEASONAL PREDICTABILITY/PREDICTION**

»» **RISK ASSESSMENT OF WEATHER/CLIMATE EXTREMES**

POSSIBLE PROJECTS INCLUDE...

- ✓ understanding natural vs. anthropogenic climate influences on severe convective storms

- ✓ evaluating subseasonal-to-seasonal prediction capabilities for renewable energy production

- ✓ investigating future changes in teleconnections with both simple and state-of-the-art climate models

👤 Looking for 1-2 PhD Students for Fall 2025

Kelsey Malloy
Department of Geography and Spatial Sciences
